Motivated computer science graduate with a strong foundation in programming, data structures, and algorithms. Pursuing MCA to advance skills in software development, AI, and data analysis

PROFILE

Strong foundation in computer science principles and a proven ability to solve complex problems. Passionate about building dynamic, user-friendly web applications and eager to contribute to innovative projects. Quick to adapt and learn new technologies, with proficiency in HTML, CSS, Java, Bootstrap, and more. Motivated to grow within a forward-thinking tech company while delivering impactful solutions.

PROJECTS

eBOOK STORE - MERN stack Development

- Online book store where anyone can buy and sell books.
- Fully deployed on Render and connected to MongoDB atlas** for the database server
- Authorized sellers can upload, delete and edit their products after they have logged in the system.
- All the essential features like authentication, authorization and an Interactive UI were taken into account.
- Ethereal SMTP service** is included for resetting the password if forgotten by the user.

News Monkey Website - API based Project

- Implemented a robust API project for News Monkey website using the MERN (MongoDB, Express.js, React.js, Node.js) stack, facilitating seamless data retrieval and management.
- Integrated News API to dynamically fetch and display fresh news content on the website, ensuring users access up-to-date information across various categories and sources.

SnapURL - MERN stack project (Current project)

- Developing a web application that allows users to input a URL and generate a shortened version. This is in development phase.
- Creating a user-friendly interface with HTML, CSS, and JavaScript for seamless interaction.

WORK EXPERIENCE

Internship

Oct 2023 - Jan 2024

FCM Travel Solutions. Pvt.

- Assisted in developing and optimizing web applications for travel management, gaining hands-on experience in full-stack development and improving booking system efficiency.
- Collaborated with senior developers to troubleshoot issues, implement new features, and enhance user interface, contributing to key project deliverables

Team Lead (Part time)

Jan 2024 - Present

Codingal Inc.

- Recently promoted to a leadership position, successfully managing and mentoring a dynamic team to achieve exceptional results.
- Joined Codingal as a Coding Instructor in September 2023, excelling in teaching coding languages such as JavaScript, HTML, CSS, and Java to students from various countries like USA, UK, Canada, India etc.
